

The fireplace, *rekindled.* **FireRock**

PRECISION-ENGINEERED

MASONRY FIREPLACES

FireRock offers a simple way to build a high-end, all-masonry fireplace and chimney. This smartly designed system installs in a matter of hours for less than half the cost of a traditional brick & mortar fireplace. Not only does it look great, it lasts forever.

Why FireRock?

Installs Fast.

Installs in less than a day compared to 1 to 2 weeks for traditional brick & mortar.

Strong.

3000 PSI compressive strength. The strongest on the market.

Smart.

Costs 50% less than traditional brick & mortar, and is precision-engineered to draw correctly.

Stunning.

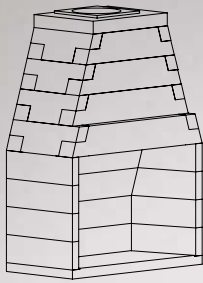

Looks better and lasts longer than a "metal box" fireplace.

Long Lasting.

All models come with a 20 year warranty and a 100 year life expectancy.

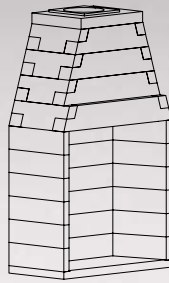

You could spend twice as much building a traditional brick & mortar fireplace, but the only person that would know would be your accountant.

CONVENTIONAL

- FireRock's traditional model
- Angled back wall for better heat reflection
- Can be installed on a combustible floor using LiteRock installation application
- Accommodates FireRock masonry or approved metal chimney system

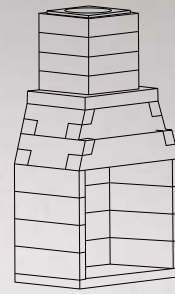

Available in six sizes: 30", 36", 42", 48", 60", and 72"

RUMFORD

- Taller opening allows for a larger fire and greater heat reflection
- Great for homes with high ceilings
- Accommodates FireRock masonry or approved metal chimney system

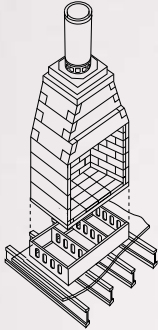

Available in four sizes: 30", 36", 42", and 48"

OUTDOOR

- FireRock's solution for use in outdoor living spaces
- Firebox and chimney deliver on a single pallet

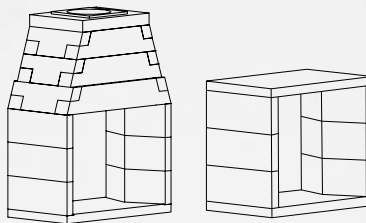

Available in three sizes: 30", 36", and 42"

LITEROCK

- Allows for a wood burning fireplace on any combustible floor system
- Great for remodeling projects or second floor fireplace applications
- Requires the use of an approved metal chimney

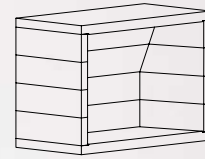

Available in three sizes: 30", 36", and 42"

SEE-THROUGH

- Best see-through fireplace design on the market
- Architectural beauty of a fireplace in two rooms with only one flue
- Accommodates FireRock masonry or approved metal chimney system
- Also available in vent-free

Available in four sizes: 30", 36", 42", and 48"

VENT-FREE

- Allows for a true masonry fireplace without a chimney
- Perfect for remodeling projects
- Can be installed on a combustible floor
- No glass doors required

Available in four sizes: 30", 36", 42", and 48"

Custom sizes available.

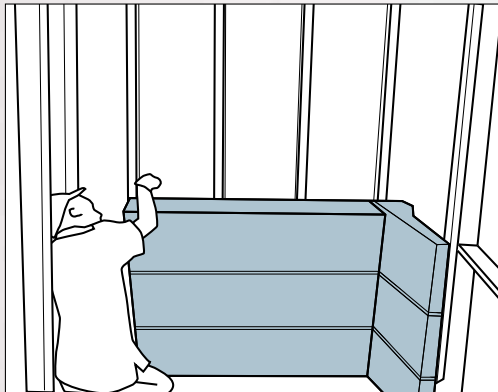

Installs in a matter of hours.

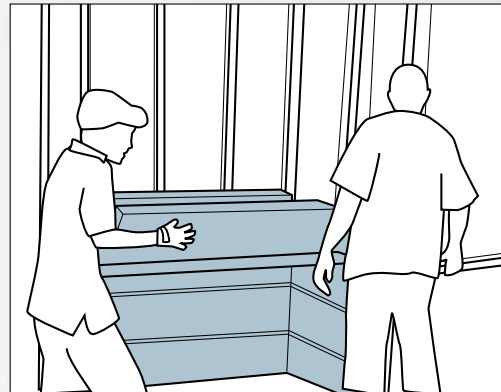

1 Set base plate on non-combustible foundation.

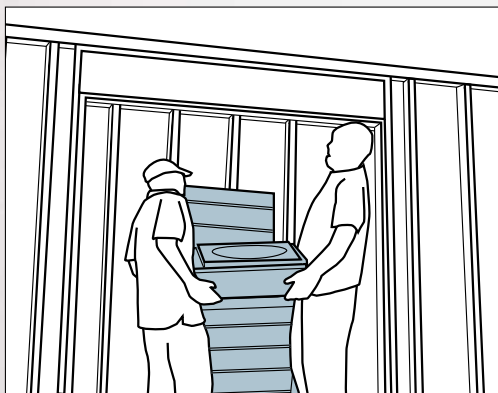

2 Stack fire box sides and start building the back.

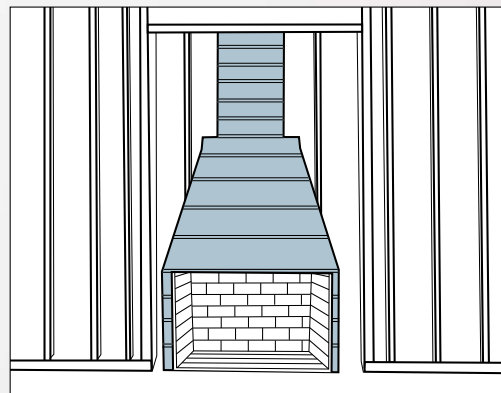

3 Place centerbacks along rear of base plate.

4 Set high-draft throat along top and build smoke chamber.

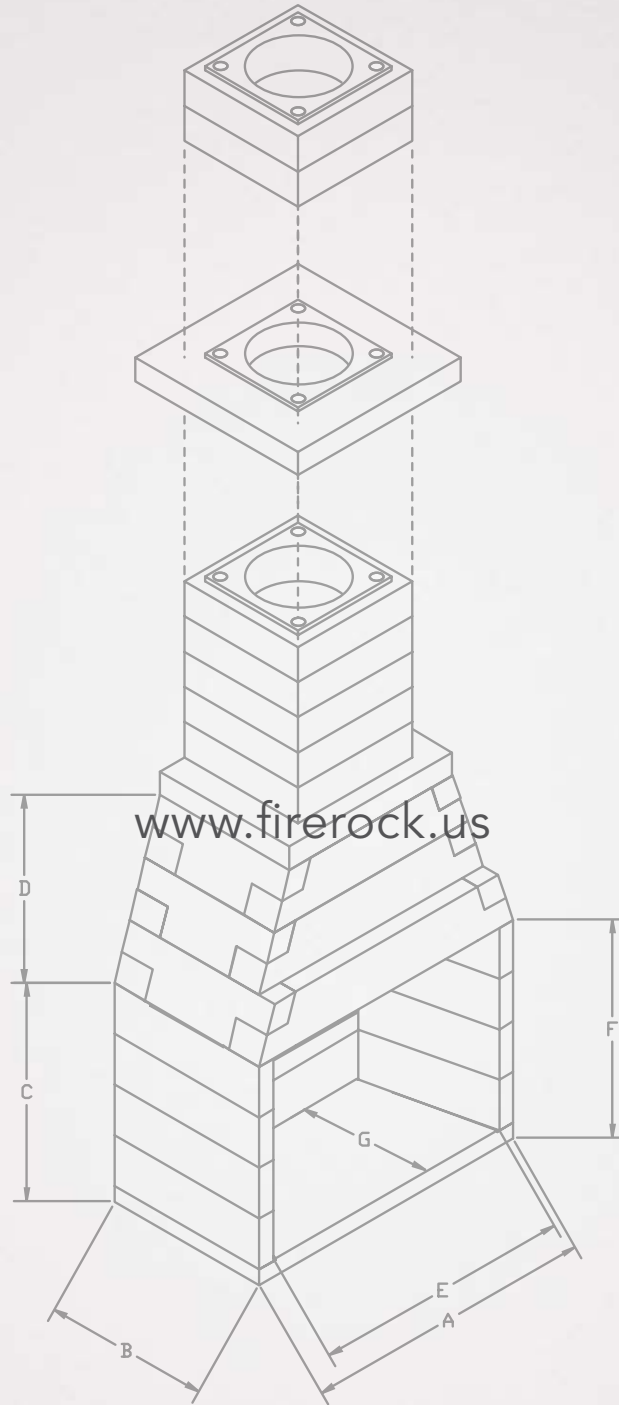

5 Set chimney blocks in place.

6 Install firebrick and fireplace is complete. Use FireRock's specially formulated adhesive mortar and always refer to the detailed instruction manual.
